Subject: Lynn Spring/dove Creek Quarries (M/003/016 & M/003/025)

The meeting went well today. Utah Building Stone had a draft of the Lynn Springs plan that they said would be finalized and submitted by February 13th. They would like to have approval by the end of July (August at the latest). I told them they could go in to perform reclamation prior to permit approval.

Dove Creek plan should be submitted to us by the end of March, 1998. The Forest Service indicated that a bond (iterim) would need to be posted prior to operations this year (anticipated start-up early May.). UBS would like a good estimate of bond amount (as close to final figure as possible) in hopes that the bond would not need to be changed prior to final permitting (expected in August/september).

Joelle, would you please cc to mine files.
